PRODUCT: DAC Tape Blue Lens Tape

PRIMARY USE:

Lens protection tape for alloy blocking.

DESCRIPTION:

A highly conformable 4 mil blue lens protection tape specifically designed to be used with alloy blocking on all types of lenses. DAC Tape is designed to hold securely to both the lens and alloy blocking medium, preventing premature release during generation in both wet and dry processes. DAC Tape de-blocks quickly and easily from the alloy while the specially designed adhesive removes from the lens cleanly with no residue. DAC Tape utilizes a silicone liner which protects and stabilizes the adhesive's properties.
